

1. 输入了中文字符

D:\桌面\未命名2.cpp	[Error] stray '\243' in program
D:\桌面\未命名2.cpp	[Error] stray '\273' in program

2. 缺少分号

D:\桌面\未命名2.cpp	[Error] expected ';' before 'return'
----------------	--------------------------------------

3. 变量/函数没有声明或者定义

D:\桌面\未命名2.cpp	[Error] 'printf' was not declared in this scope
----------------	---

4. 数组开的太大

C:\crossdev\src\mingw-w64-v3-gcc\mingw-w64-crt\... (text+0x1f6): relocation truncated to fit: R_X86_64_PC32 against symbol '_imp_Sleep' defined in .idata\$5 section in C:\Program Files (x86)\Dev-Cpp\MinGW64\x86_64-w64-mingw32\lib\libkernel32.a(dgnms01196.o)	
C:\crossdev\src\mingw-w64-v3-gcc\mingw-w64-crt\... (text+0x280): relocation truncated to fit: R_X86_64_PC32 against symbol '_imp_SetUnhandledExceptionFilter' defined in .idata\$5 section in C:\Program Files (x86)\Dev-Cpp\MinGW64\x86_64-w64-mingw32\lib\libkernel32.a(dgnms01183.o)	

5. 变量/函数标识符重复

D:\桌面\未命名2.cpp	[Error] redefinition of 'int a'
----------------	---------------------------------

6. 把关键词当作了标识符

D:\桌面\未命名2.cpp	[Error] multiple types in one declaration
----------------	---

```
1 #include<stdio.h>
2 int char;
3
```

7. 程序结束不了(死循环)

8. 数字除0

D:\桌面\未命名2.cpp	[Warning] division by zero [-Wdiv-by-zero]
----------------	--

9. 全局数组使用变量定义大小

2	
3	int b = 100;
4	int a[b];
5	
D:\桌面\未命名2.cpp	[Error] array bound is not an integer constant before ']' token

10. 不存在的关键词

2	intj a[b];
2	1
D:\桌面\未命名2.cpp	[Error] 'intj' does not name a type

11. 缺少})

D:\桌面\未命名2.cpp	[Error] expected '}' at end of input
D:\桌面\未命名2.cpp	[Error] expected '}' before ';' token
D:\桌面\未命名2.cpp	[Error] expected '}' before ';' token
